DETAILED ACTION

1. Claims 1-25 have been presented for examination. Claims 1-7, 11, and 13 have been amended, claims 8-10 and 12 have been cancelled, and new claims 14-25 have been added in an amendment filed 03/31/2004. Claims 1-7, 11, and 13-25 have been examined.

Terminal Disclaimer

2. The terminal disclaimer filed on 03/31/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application No. 09/407,785 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

3. Claims 1-7, 11, and 13-25 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claims 1-6; 7 and 19-23; and 13-14 are drawn to a method, a communication system, and a computer readable medium for communicating a session key, respectively. The closest prior art, Dondeti et al., U.S. Patent No. 6,263,435 B1, disclose a similar method, communication system, and computer readable medium. However, Dondeti et al. neither teach nor suggest creating and storing an original group session key associated with the secure multicast group in a first directory then receiving a new group session key for the secure multicast group, for us after addition of the first multicast proxy service node, from a local multicast proxy service node that has received the original group session key through periodic replication of the first directory.

Art Unit: 2132

This composite feature incorporated into independent claims 1, 7, and 13 render claims 1-6; 7 and 19-23; and 13-14, respectively, allowable.

Claims 11, 24, and 25 are drawn to a communication system for creating a secure multicast or broadcast group. The closest prior art, Dondeti et al., U.S. Patent No. 6,263,435 B1, disclose a similar communication system. However, Dondeti et al. neither shows nor motivates a multicast proxy service node generating a first group session key for establishing the secure multicast or broadcast group among the plurality of multicast proxy service nodes and distributing the first group session key to other multicast service nodes in the secure multicast or broadcast group using directory replication. This composite limitation explicitly recited in independent claim 11 renders claims 11, 24, and 25 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The fax number for Formal or Official faxes to Technology Center 2100 is (703) 872-9306. Faxed formal papers for application file entry, such as amendments adding claims, extensions of time, and statutory disclaimers for which fees must be charged before entry, must be transmitted with an authorization to charge a deposit account to cover such fees.
